CHECK POINT™ | CYERA

Cyera and Check Point CloudGuard: Integrated Cloud and Data Security

Integration benefits

- **Ongoing risk context:** Dive deeper into data risks by leveraging Cyera's data classification and sensitivity findings within Check Point's CloudGuard Effective Risk Management.

- **Improved risk prioritization:** Empower security teams with contextual prioritization for risk mitigation based on sensitive data fed in from Cyera.

- **Unified data visibility:** Pull data security intelligence from Cyera into Check Point's CloudGuard platform to gain a more holistic view into your riskiest cloud assets

Enhanced Data Protection with Enriched Data Context

The Cyera and Check Point integration brings data discovery, classification, and data sensitivity insights from Cyera's Data Security Platform (DSP)into Check Point's CloudGuard CNAPP solution.

By feeding Cyera's data insights into CloudGuard, security teams have more granular visibility into the data they intend to protect. This ongoing risk context helps inform, accelerate and focus risk mitigation actions, while providing a new dimension of data visibility within CloudGuard.

Unified solution

Sensitive Data Classification - Improve risk scoring and strengthen data sensitivity insights across storage assets by incorporating Cyera's DSPM classification capabilities within Check Point's CloudGuard solution.

Unified Data Asset Visibility - Access a consolidated view of data assets enhanced by Cyera's classification enrichment. Additional DSPM capabilities are available through the Cyera platform and integrated into CheckPoint's CloudGuard CNAPP for a holistic data security management experience.

..

" Partnering with Check Point marks a significant leap forward in safeguarding data security across complex environments. Together, we provide a robust defense that protects sensitive data and strengthens overall security posture. "   *— Yotam Segev, CEO and Co-Founder of Cyera*

CHECK POINT™

Bringing DSPM and CNAPP Together

- **Maximize Technology Investments:** Enhance CNAPP capabilities with data insights from Cyera's DSP solution without additional resource strain.

- **Centralize Data Risk Context:** Provide security teams with a consolidated view of data risk enhanced by Cyera's highly precise discovery and classification capabilities.

- **Accelerate Risk Response:** Take immediate action on data risks with deep context around your data, reducing exposure and streamlining actions
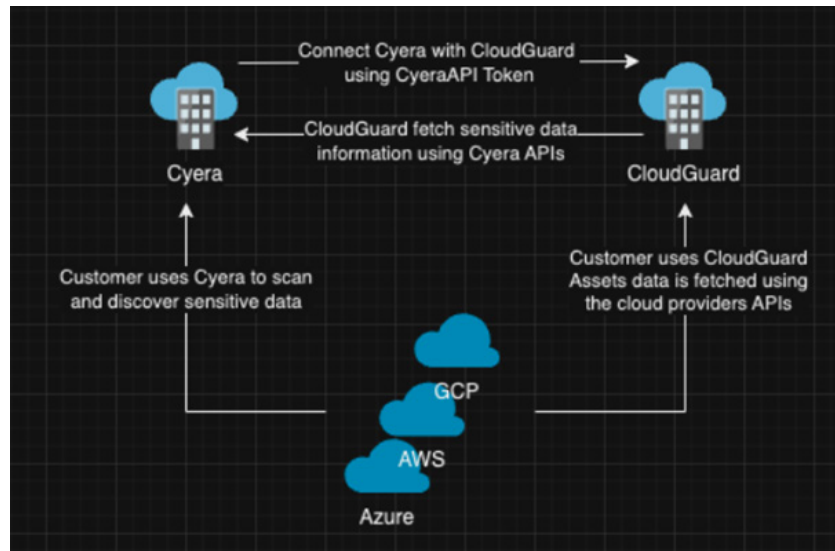

About Check Point

Check Point Software Technologies Ltd. (www.checkpoint.com) is a leading provider of cyber security solutions to corporate enterprises and governments globally. Check Point Infinity's portfolio of solutions protects enterprises and public organisa- tions from 5th generation cyber-attacks with an industry leading catch rate of malware, ransomware and other threats. Infinity comprises three core pillars delivering uncompromised security and generation V threat prevention across enterprise envi- ronments: Check Point Harmony, for remote users; Check Point CloudGuard, to automatically secure clouds; and Check Point Quantum, to protect network perimeters and datacenters, all controlled by the industry's most comprehensive, intuitive unified security management; Check Point Horizon, a prevention-first security operations suite. Check Point protects over 100,000 organizations of all sizes.

About Cyera

Cyera is an AI-powered data security platform that helps organizations manage and protect their data in today's complex digital landscape. The company's platform combines advanced Data Security Posture Management (DSPM) with real-time enforcement controls, providing customers with a comprehensive solution for securing their data assets against evolving threats.
